Education

National Engineering Degree in Computer Science
ESPRIT 2019–2024

Skills

Programming Languages:
Java, JavaScript, TypeScript, PHP, Python, C, C++, C#, SQL, Dart, Swift
Frontend & UI:
Angular, React, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend & Frameworks:
Spring Boot, Laravel, Symfony, Node.js, REST APIs, .NET, Django, Flutter
Databases & ORM:
MySQL, PostgreSQL, MongoDB, Doctrine, Eloquent, JPA/Hibernate
DevOps & Cloud:
Git, GitHub, Docker, Docker Compose, Jenkins, AWS, Linux, Hostinger, CI/CD
Testing & Development Tools:
Postman, PHPUnit, JUnit, Mockito, SonarQube, Figma, Jira, Xcode, Unity, StarUML
Architecture & Methods:
Agile/Scrum, MVC, SOLID, Clean Architecture, Microservices, UML, OpenAPI/Swagger, JWT, OAuth 2.0, Unit/Integration Testing

Professional Experience

Full Stack Developer — Call Energie Vert January 2025 – Present
- Development and maintenance of web applications and professional websites using Laravel, Spring Boot, Node.js, and Angular.
- Design and integration of modern, responsive, and user-oriented web interfaces.
- Development and integration of REST APIs and backend services ensuring performance and scalability.
- Participation in business needs analysis and translation into technical solutions.
- Implementation of testing strategies including unit and integration tests to ensure code quality and reliability.
- Debugging, bug fixing, and continuous improvement of application performance.
- Collaboration with cross-functional teams in an Agile (Scrum) environment.

Development Intern — Kian Technology 2024
- Contributed to the development of a low-code platform dedicated to mobile application generation.
- Contributed to frontend development with Angular and backend integration with Spring Boot.

Back-end Development Intern — WXL 2023
- Design and development of back-end features using Java and Spring Boot.
- Design of REST services and integration with the database.
- Performed unit testing and fixed technical issues.

Back-end Development Intern — Itserv 2022
- Design and development of business services using Java and Spring Boot.
- Integration of REST APIs and contribution to backend structuring.
- Performed unit and integration testing with JUnit and Mockito.

Web Development Intern — Tunisie Télécom 2021
- Created and integrated user interfaces using HTML and CSS.
- Performed display testing and validated compatibility across different web browsers.
- Contributed to improving interface ergonomics and presentation.

Academic Projects

- **Clinic Management Application** — Design and development of a desktop application dedicated to patient management using Qt and Arduino.
- **Blockchain Learning Mobile Application** — Development of an educational mobile app using Node.js, Android Studio, and Xcode.
- **2D/3D Mobile Game** — Development of a mission-based mobile game using Unity and Node.js.
- **Event Management Web Application** — Development of a microservices-based web application using Spring Boot, Angular, and MySQL.
